10

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

20

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 6,002,248 to Binder (hereinafter “Binder”).

Art Unit: 2876

Re claim 1, Binder discloses an IC tagged bearing device comprising a chip (6) embedded in an elastic bearing seal (5), that is delimited between the inner race and the outer race, wherein the IC chip (6) comprising a storing means (22) that is capable of performing communication on a non-contact basis (col. 3, lines 33-34). In addition, it is apparent the sealing
5 (5) includes a metal core for preventing the collapse of the sealing material during operation. The seal (5) is made of an elastic element (col. 5, lines 50-64).

Allowable Subject Matter

6. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be
10 allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter:
The claims are directed at a sealing member for IC-tagged bearing device. The device whose structure as described in the objected claims are neither disclosed nor suggested by the cited
15 references.

Conclusion

I. The prior art made of record and not relied upon is considered pertinent to applicant's
20 disclosure: Nakajima et al. (US 20070126587); Gogami et al. (US 6,076,737); Hirai et al. (US 6,160,526) disclose various embodiments of IC bearing devices. Applicant is respectfully suggested to carefully review these references.
